

Unit 2 — Globalisation Debates

Track E · Klasse 12 · Niveau E (Basisfach / Leistungsfach)

Niveau E

1. Reading

Read the text, then answer in full sentences.

World trade as a share of GDP rose from 39 % in 1990 to 60 % by 2008. It has plateaued since. The supporters of the post-1990 trade order point to the lifting of approximately one billion people out of extreme poverty over the same period — predominantly in East and South Asia. Critics respond that intra-country inequality in advanced economies grew sharply, that supply-chain fragility was severely under-priced before 2020, and that environmental externalities were systematically exported. Both sides hang on empirical claims that are roughly correct.

2. Practise

1. Match: comparative advantage → trade theory; externality → unpriced cost; reshoring → moving production back home.
2. T or F: *world trade as a share of GDP* rose from 39 % to 60 % between 1990 and 2008; intra-country inequality fell in advanced economies during the same period.
3. Build 4 sentences using 4 globalisation-debate terms.

3. Write

Op-ed, 350 words. Hold two readings of globalisation in tension. Use 5 globalisation-debate terms + 2 academic hedges + 1 cleft + 1 *despite / given that*.

Lösungen **Controlled.** 1. all true.
2. T, F (intra-country inequality grew in advanced economies).
Productive. 3. Open.
